## ADDITIONAL COMMENTS

- Your screens should give us (customers) to get an idea of what you want to create. Focus on the MAIN screens of your project (i.e. not help, error, login pages).
- USE pencil (<https://pencil.evolus.vn/> ) or drawIO (<https://app.diagrams.net/> ) to draw UI sketches. We are looking for functionality rather than "pretty" -- but of course, we want diagrams drawn neatly and we want legible writing.
- **Please upload PDF to your team's WIKI on gitlab.**
- Also, upload as a submission to this assignment.
